IMEC Celebrates 35th Anniversary

Above (l-r): IMEC's Dan Conner and Mark Conner with an example of their fabricating and finishing work.

IMEC (Industrial Machine and Engineering Company), Monett, Missouri, is celebrating its 35th anniversary.

Founded in 1982 by Dan and Charlotte Conner, the firm is a full-service custom manufacturer that focuses on precision sheet metal fabrication, machined parts, assemblies, powder coating and special machinery. The company started out in a barn south of Monett. Dan Conner traces his manufacturing roots back to his parents in the 1950's.

Today the firm operates in a 45,000-sq.-ft. facility with 40 employees (many with more than 10 years of experience) and a wide range of CNC equipment.

Equipment at the family-owned firm includes: CNC laser cutting systems; CNC punches and shears; multi-axis CNC machining/turning centers; a complete QC

lab; a powder coating line; welding stations (spot, TIG & MIG); and assorted manual equipment.

IMEC serves OEMs in various industries including: military/defense; energy; industrial equipment; electronics; transportation; medical and aerospace.

The firm also has its own nitrogen generating system that produces nitrogen at 99.99% purity. Nitrogen is used by the firm's laser cutting systems.

IMEC is continually updating its offerings and processes to better serve customers. This includes testing, inventory management, certifications and custom manufacturing with quick turnaround.

"From dye penetrant testing hydraulic reservoirs to hi-pot testing electrical assemblies, our customers can be confident the parts we make will function as needed" commented Eric Merri-

man, plant manager and son-in-law of the Conner's. "We work hard to maintain a very flexible and lean manufacturing process."

Mark Conner, son of the Conner's and sales and marketing manager, noted that IMEC has its ISO 9001-2008 certification and is in the process of updating to the 2015 standard. The firm has been certified since 1999.

"We offer a wide range of processes and services, which sets us apart from our competitors," Dan Conner said. "We have some of the most skilled machinists and operators around and they are a major factor in our success. We focus on maintaining good relations with our customers."

IMEC can be contacted at: (417) 235-3053; Fax (417) 235-3054; 1716 N 9th Street, Monett Missouri 65708; www.imecmonett.com.

When we say assembly, we mean assembly.

More than just a parts shop, IMEC offers:

- Sheet metal **and** machining fabrication.
- Experienced MIG, TIG and Spot Welders.
- Metal finishes, including with an **in-house powder coating system**.
- Sourcing, stocking and installation of necessary **purchased components**.
- Testing and **delivery** of complete assembly.

**Make your purchasing easier:
 Let IMEC do it all.**
